

6M Hex Range

Nicoll Industries

Seen enough? Ready to order this product? Call 01283 510 570

The Hex Range is a sturdy and easy to use canopy that gives a welcome alternative to traditional square frames. Available in a variety of colours.

Product Features:

- Constructed from extremely strong and thick aluminium (50mm x 2.5mm) with steel metal joints. Complete with bungs on the end of the frame tubes to prevent tearing of the roof cover. The instafame has 5 different height settings with a maximum eave clearance of 7' 4" and a maximum overall height of 11' 7". There are then five different height settings to reduce this with 3" increments between settings.
- Full roof truss with oval cross bars and bolt and nut system which allows easy replacement of bars. Comes complete with carry bag. We can offer a full range of replacement parts, and a full 12 months manufacturers' defect warranty if the worst should happen.
- Includes matching sides with mud guard/skirt. Two of the sides have windows with a roll up/down blind on the inside of the side sheet. This can be closed for those who wish to close the structure up overnight at a show and they can be rolled up and held in place with velcro to allow more light. There is also two blank sides and two with zipper doorways. Comes complete with carry bag.
- 550gsm PVC coated sides attach with velcro on legs and thick velcro strip which runs the full length of the roof valance with the addition of zipped corners to ensure sides do not fly open in windy weather.
- Large triangular feet for pegging/bolting down.
- Unique pin locking system in the adjustable legs.
- Packs into a carry bag which measures approximately 5' 6" in height.

Uses:

- Motorsport
- Great for motocross!
- Biking events
- Pit canopies
- Show stands
- Fairs

Why buy?

- 550gsm Polyester PVC coated fabric
- Fire retardant to BS7837:1996
- PVC coated material is much more waterproof than a PU coating
- Stand out with a massive 23.38sqm area

Why Buy one of our Instant Canopies?

Celebrating over a decade of retailing instant pop up canopies, we at Nicoll Industries are quickly building a strong relationship with not just individual clients, but a growing number of blue chip PLC companies as well.

We are here to offer excellently priced products built over the years from innovation and feedback. Apart from Vitabri, which we import from Europe, the majority of our products are British designed and they are manufactured at highly competitive prices by a variety of worldwide partners.

Recently supplied clients include: Autoglass, Autosmart, the Irish FA, Diabetes UK, NHS, Top Gear, GMB Union, Country Life and many more. They trust us to deliver quality products at highly competitive prices all backed up with a superb guaranteed after sales service. Why not join them?

Here are some of the wide variety of uses for instant pop up canopies:

Smart Repairs

Instant pop up canopies are ideal for shelter from the elements when carrying out smart repairs. We already supply a large number of smart repair companies such as Autoglass, Autosmart and Revive! so why not look at purchasing one for your smart repair business.

Not only do they provide coverage to work under, but they are a great marketing tool, advertising you and your business wherever you are, whether it be a local supermarket car park or at your customer's premises.

Work Tents

Our instant pop up gazebos are ideal as a work tent. They are quick to erect and highly mobile, giving you excellent coverage from the elements, whilst allowing you to quickly carry out your jobs.

Used extensively already in smart repair industries, increasingly instant pop up canopies are being used by the emergency services as privacy tents or particularly forensic tents. Carpenters, plumbers, window fitters, valet companies, gardeners and many more also make use of the flexibility of instant canopy structures. We have supplied many DIY TV programmes such as 60 Minute Makeover with our canopies for this particular purpose.

Motorsport/Biking Events

Our instant canopies are great for any sporting event. They provide instant shelter for your equipment, competitors or spectators. They are widely used in motorsport such as F1, Moto GP, Dirt Bike racing etc by suppliers and competitors alike.

Most widely used as a pit awning, they are great for branding.

Market/Show Stalls

One of the original concept ideas behind instant canopies was their use as a market stall or trade stand. For us as a company, this was how we first started distributing canopies. We originally manufactured traditional market stalls, but with a rise in Continental markets, the pop up market stall became a popular and innovative idea. With the need to overhaul the general image of markets, more and more market operators realised the potential of a professional, easy to erect framework. It transformed markets in this country overnight.

A lot of market traders purchase recreational gazebos to use as a market stall in an attempt to save money. If you are using a pop up canopy as your market stall, day in day out and in all weathers, a lightweight cheap gazebo will not give you any protection and when you could be stood selling your products, you will be constantly worrying that your stall is going to blow away in the lightest of winds.

The old adage, "Buy Cheap. Buy Twice" is very applicable to gazebos. We sell reasonably priced pop up canopies that do not compromise on specification, but provide strength, security, peace of mind and a professional look that will last.

Promotional Marketing Tool

Instant pop up canopies are a great vehicle for company branding. Printing and livery is a large part of what we do here with our instant canopy work. No matter what your chosen use, the chances are that you will require some level of printing whether it be simple text or the reproduction of a digital photographic image.

We are able to produce different printing according to which canopy you choose.

Hospitality/Catering

With an increase in cafe culture in the UK, the catering and hospitality industry is one of the fastest growing sectors making use of instant canopies. They are ideal for use outside of restaurants and cafes for sheltered dining and relaxing, creating a professional looking seating area which becomes an extension of the interior design of the establishment.

Mobile caterers use them at events. Nightclubs and pubs use them as an entrance and they are ideal for promoting drinks or promotions. They are also great as a smoking shelter.

Sport Clubs

Growing numbers of sports clubs are recognising the relevant uses of an instant pop up canopy. Large numbers of amateur and professional football teams, rugby clubs, rowing clubs, athletics clubs, tennis clubs and golfers realise the potential of having instant coverage at an event.

They provide shade from the weather, a base for equipment and an ideal vehicle for promoting events or club membership.

Camping/Caravanning

The camping and caravanning leisure market widely use instant pop up canopy gazebos for shelter outside of tents and awnings. They make great kitchen huts, toilet tents, storage or dining areas.
