

# Printing Techniques

Nicoll Industries

Seen enough? Ready to order this product? Call  
**01283 510 570**

**Nicoll Industries are proud to offer a comprehensive range of printing techniques to our valued customers. Whatever product you may need, we have the capabilities and experience to badge your canopy or marquee with top quality printed graphics.**

## Vinyl Heat Transfer

**A range of standard colour vinyls are used to produce simple text and logos on Swift Shelter commercials, Professional 40 and Instaframe 50. We can print on roof face, roof valance and outside of sides.**

The vinyl is heat pressed onto the fabric until it becomes integrated with the fabric. Non-peelable, UV retardant and flexible.

## Digital Image Vinyl Heat Transfer

**A digital image of simple text and logos are printed onto white vinyl which is then heat pressed onto fabric until it becomes integrated with the fabric. Non-peelable, UV retardant and flexible.**

Can be used on Swift Shelter commercials, Professional 40 and Instaframe 50. We can print on roof face, roof valance and outside of sides. Restrictions in size apply.

## Screen Printing

**Our screen printing facility is sub-contracted to specialist manufacturers and industrial screen printers. This allows us to offer a completely bespoke service to our customers.**

Can be used to produce one off designs, but more cost effective on multiple canopies of 20 or more.

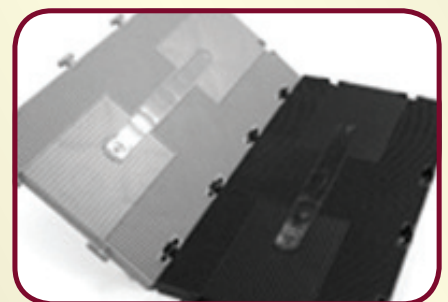

## Full Digital Printing

**Our VITABRI canopies allow for full digital printing on all sides of the canopy. Where photographs or complex designs or logos are required, this printing technique is the best and most cost effective way to achieve the best result.**

Please call for more information regarding VITABRI and full digital printing on your canopy.
